

iTrack™ Canaloplasty to be Featured at the 2024 Royal Australian and New Zealand College of Ophthalmologists (RANZCO) Annual Congress

California, USA, November 1, 2024 – Nova Eye Medical Limited, a medical technology company committed to advanced ophthalmic treatment technologies and devices, is pleased to announce that the Company's proprietary iTrack™ canaloplasty technology platform will be featured in numerous posters during the official scientific program of the Royal Australian and New Zealand College of Ophthalmologists (RANZCO) annual scientific congress on November 1-4, 2024 in Adelaide, Australia.

A summary of the RANZCO 2024 posters available on demand featuring the *iTrack™* and the *iTrack™ Advance* is included below.

Nathan Kerr, MD; David Lubeck, MD; Keith Barton, MD; Jason Cheng, MD
iTrack Global Data Registry to Support the Role of Canaloplasty for Treatment of Glaucoma

David Lubeck, MD; Keith Barton, MD; Nathan Kerr, MD; Jason Cheng, MD
Multicenter Canaloplasty Data Registry – Outcomes of Ab-Interno Canaloplasty Across Different Glaucoma Types and Severity

David Lubeck, MD; Keith Barton, MD; Nathan Kerr, MD; Jason Cheng, MD
Canaloplasty Effectiveness Correlated with Viscoelastic Volume Delivered

Jason Cheng, MD; David Lubeck, MD; Keith Barton, MD; Nathan Kerr, MD;
Clinical Outcomes and Safety Profile of Standalone Canaloplasty vs. Canaloplasty Combined with Cataract Surgery Using the iTrack Microcatheter

The company's latest canaloplasty innovation, *iTrack™ Advance* will also be included in the course "*Enhancing Trabecular Meshwork MIGS: Maximizing Results, Overcoming Challenges, and Effectively Managing Complications*".

Monday November 4th - 10:30 AM - 12:00 PM - Hall A

Full session details can be accessed via the RANZCO program:

All educational content of the RANZCO Annual Scientific Congress is planned by its Program Committee. The RANZCO do not endorse, promote, approve, or recommend the use of any products, devices, or services.

ABOUT NOVA EYE MEDICAL

Nova Eye Medical Limited is a medical technology company that develops, manufactures and sells a portfolio of proprietary ophthalmic treatment technologies and devices. Used by eye surgeons in more than 100 countries globally, these technologies include the iTrack™ portfolio of canaloplasty devices for the treatment of glaucoma. The Company also manufactures and sells the proprietary Molteno3® glaucoma drainage device for the treatment of severe or complex glaucoma. With its sales headquarters based in Fremont, California, Nova Eye Medical is supported by sales offices in Adelaide, Australia and Berlin, Germany, and a global network of more than 50 distribution partners. Manufacturing facilities are located in Fremont, California and Dunedin, New Zealand.

ABOUT CANALOPLASTY

First introduced in 2008, canaloplasty is a surgical treatment for glaucoma that targets the main sites of outflow resistance in the conventional outflow pathway: the trabecular meshwork, Schlemm's canal, and the distal collector channels. Based on the same principles as angioplasty, a flexible microcatheter is cannulated 360 degrees around Schlemm's canal during the procedure to manually break and remove blockages. Next, viscoelastic fluid is injected into Schlemm's canal as the microcatheter is withdrawn to dilate the distal outflow system and to improve the function of the trabecular meshwork.

The iTrack™ Advance canaloplasty device has a US Food and Drug Administration (FDA) 510(k) and CE Mark (Conformité Européenne) for the treatment of open-angle glaucoma.

Indications for Use, US: The Nova Eye iTrack™ Advance is indicated for fluid infusion or aspiration during surgery. The Nova Eye iTrack™ Advance is indicated for the cutting or disruption of the trabecular meshwork during goniotomy procedures. The Nova Eye iTrack™ Advance is indicated for catheterization and viscodilation of Schlemm's canal to reduce intraocular pressure in adult patients with open-angle glaucoma.*

** The iTrack™ Advance cutting function (goniotomy) is a Class 1 510(k) exempt device function that is not specifically indicated for the reduction of intraocular pressure (IOP) or the treatment of open-angle glaucoma.*

Indications for Use, International: The Nova Eye iTrack™ Advance is indicated for fluid infusion or aspiration during surgery. The Nova Eye iTrack™ Advance is indicated for catheterization and viscodilation of Schlemm's canal to reduce intraocular pressure in adult patients with open-angle glaucoma.
