

# Discover iTrack™ for Glaucoma.

Normal Vision

Vision with Advanced Glaucoma

Minimize  
glaucoma pressure.  
Maximize relief.

**Restorative, minimally-invasive  
glaucoma surgery (MIGS).**

Performed with breakthrough microcatheter technology, iTrack™ uses the principles of angioplasty to enlarge your eye's natural drainage pathway in the treatment of glaucoma.

A simple three-step procedure, iTrack™ can reduce the elevated intraocular pressure associated with glaucoma. It can also free you from the financial and lifestyle burdens of glaucoma medications.
